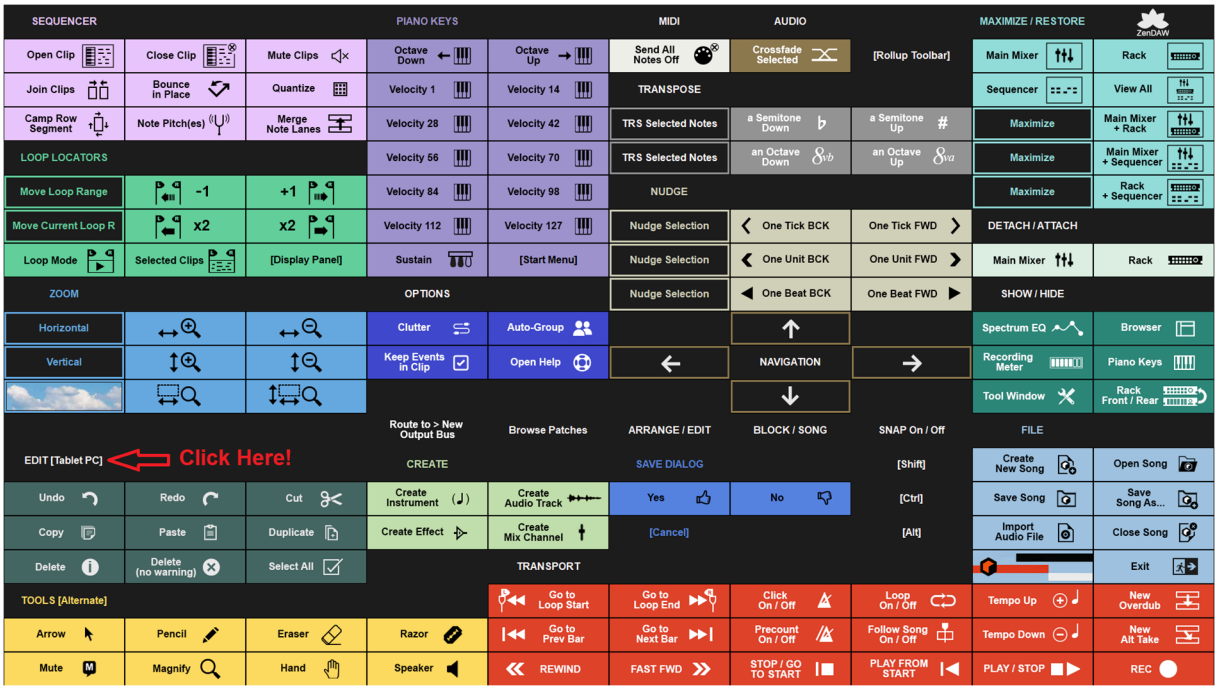
Touchscreen Setting Procedure.

Click on “PLAYBACK [Tablet PC]” on CLOUDKEYS.
The settings window will open.

In some cases, if you have set your touchscreen as your Main Monitor, this window setting can be launched under your CLOUDKEYS workspace. In this case type F12 (for CLOUDKEYS) or F11 (for CLOUDKEYS Alt) to Toggle show/hide the workspace.



Then click with your mouse or your finger on the parameterer tab.
Follow the instructions on the screen.
