

## ZENDAW 1.0.8 MENUS AND FUNCTIONS

### AUDIO

- Mixer - Meters: Reset
- Audio - Fade In to Cursor
- Audio - Fade Out to Cursor
- Audio - Increment Fade-In Length
- Audio - Decrement Fade-In Length
- Audio - Increment Fade-Out Length
- Audio - Decrement Fade-Out Length
- Audio - Crossfade
- Audio - Adjust Fades to Range
- Audio - Open Fade Editors
- Audio - Remove Fades
- Audio - Increment Event Volume
- Audio Decrement Event Volume
- File - Export Audio Mixdown
- Files - Import Audio File
- Direct Offline Processing - Direct Offline Processing
- Audio - Bounce Selection
- Devices - Audio Connections
- Devices - VST Performance (Audio Performance)

## CONTROLLER LANES - AUDIO

- Audio - Disable/Enable Track
- MIDI - Controller Lane Setup 1
- MIDI - Controller Lane Setup 2
- Process - Reverse
- Audio - Create Sampler Track (to Sampler)
- Edit - Secondary Parameter: Decrease
- Edit - Primary Parameter: Increase
- Automation - Show Automation
- Automation - Hide Automation
- Edit - Show Lanes
- Process Project Logical Editor - Delete Muted Elements (/ MUTED EES)
- Edit - Primary Parameter Decrease
- Edit - Primary Parameter Increase
- Audio Alignment - Open Audio Alignment Panel
- MIDI - Show/Hide Controller Lanes
- MIDI - Show Used Controllers
- Edit - Select Controllers in Note Range
- MIDI - Delete Continuous Controllers
- Transport - Enter Time Signature

## VELOCITY - CCs

VELOCITY - CCs (MOVE CURSOR)					
 +10	 -10	 50	 80	 110	 127
 +5	 -5	 40	 70	 100	 120
 +1	 -1	 30	 60	 90	 85-105
SEL CC1	SEL CC7	SEL CC16	CC (+10)	CC (+5)	CC (+1)
SEL CC2	SEL CC11	SEL CC21	CC (-10)	CC (-5)	CC (-1)
 CC1 to CC11	 CC11 to CC1	P FWD (+4)	P BWD (-4)	DNB A (+4)	DNB A (-4)

Edit - Stationary Cursor (Move Cursor)

Process Logical Preset - Velocity +10; -10; +5; -5; +1; -1

Process Logical Preset - Velocity 30; 40; 50; 60; 70; 80; 90; 100; 110; 120; 127

Process Logical Preset - Velocity random 85 to 105

Process Logical Preset - Select CC1; CC2; CC7; CC11; CC15; CC21

Process Logical Preset - CC +10; -10; +5; -5; +1; -1

Process Logical Preset - Copy CC1 to CC11; Copy CC11 to CC1

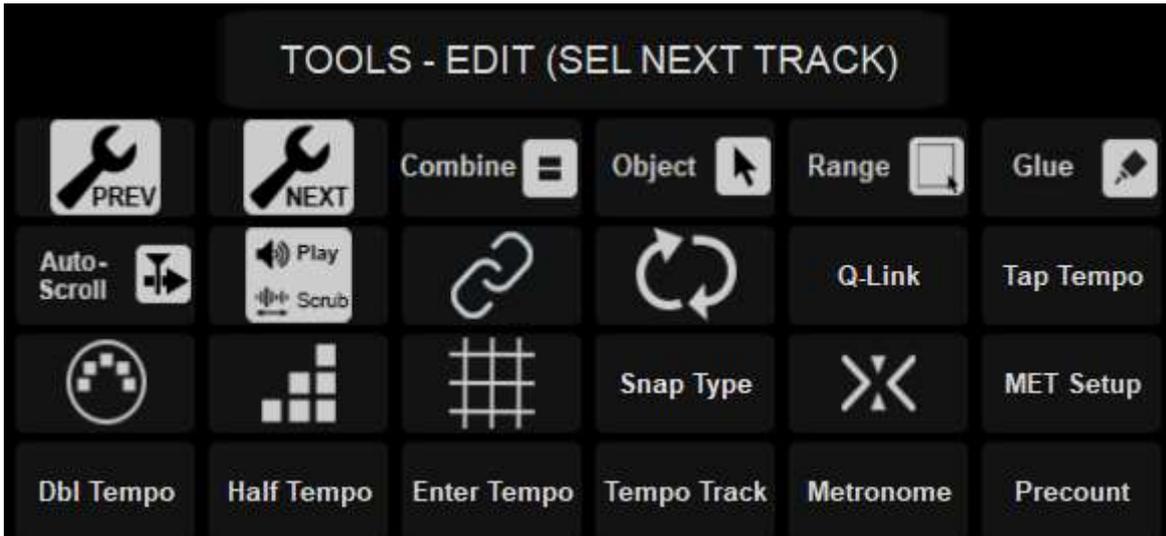

Process Logical Preset - Push Forward +4 Ticks

Process Logical Preset - Push Backward -4 Ticks

Process Logical Preset - Downbeat Accent +4

Process Logical Preset - Downbeat Accent -4

## TOOLS – EDIT

Project - Select Track: Add New

Tool - Previous Tool

Tool - Next Tool

Tool - Combine Selection Tools On/Off

Tool - Object Selection Tool

Tool - Range Selection Tool

Tool - TimeWarp Tool

Edit - Auto-Scroll On/Off

Tool - Play Tool

Edit - Toggle Link Project and Lower Zone Editor Cursor

Transport - Cycle

Mixer - Q-Link

Project - Beat Calculator

MIDI - Toggle MIDI Input

MIDI - Toggle Step Input

Edit - Select Next Grid Type

Edit - Snap On/Off

Transport - Metronome Setup

Process Logical Preset - Double Tempo

Process Logical Preset - Half Tempo

Transport - Enter Tempo

Project - Open Tempo Track

Transport - Activate Metronome

Transport - Use Precount

## QUANTIZE

Transport - Enter Project Cursor Position (Go to Bar)

Quantize Category - Set Quantize to 1/1

Quantize Category - Set Quantize to 1/2

Quantize Category - Set Quantize to 1/4

Quantize Category - Set Quantize to 1/8

Quantize Category - Quantize MIDI Event Ends

MIDI - Fixed Lengths

Quantize Category - Set Quantize to 1/16

Quantize Category - Set Quantize to 1/32

Quantize Category - Set Quantize to 1/64

Quantize Category - Set Quantize to 1/128

Quantize Category - Create Groove Quantize Preset

Quantize Category - Auto Quantize On/Off

Quantize Category - Toggle Quantize Dotted

Quantize Category - Toggle Quantize Triplet

MIDI - Legato

Quantize Category - Quantize

Quantize Category - Iterative Quantize On/Off

Quantize Category - Reset Quantize

Process Logical Preset - Transpose + 12

Process Logical Preset - Transpose + 1

Process Logical Preset - Transpose + 1/2

Quantize Category - Quantize Panel

MIDI - Delete Overlaps (poly)

MIDI - Delete Doubles

Process Logical Preset - Transpose - 12

Process Logical Preset - Transpose - 1

Process Logical Preset - Transpose - 1/2

Quantize Category - AudioWarp Quantize On/Off

Edit - Insert Bars  
Project - Tempo Detection

## EDIT

MIDI - Bounce MIDI  
Edit - Cut  
Edit - Copy  
Edit - Paste  
Edit - Duplicate  
Edit - Paste at Origin  
Edit - Select All  
Edit - Delete  
Edit - Paste Time  
Edit - Cut Time  
Edit - Insert Silence  
Edit - Move to Cursor  
Edit - Select None  
Edit- Undo  
Edit - Redo  
Edit - Split Loop  
Edit - Split at Cursor  
Edit - Select from Start to Cursor  
Edit - Select from Cursor to End  
Transport - Set Left Locator to Project Cursor Position  
Transport - Set Right Locator to Project Cursor Position  
Edit - Mute/Unmute Objects  
Transport - Locate Selection Start  
Process Logical Preset - Select Highest Pitch  
Process Logical Preset - Select Lowest Pitch

## ZOOM AND ADD TRACKS

ZOOM AND ADD TRACKS (Folder)
